

Which Beverages Rot Your Teeth?

Name: \_\_\_\_\_

Materials

- \*Cups of uniform size to hold liquids
- \*Water, vinegar, orange juice, a diet soda, a lemon-lime soda and a dark soda
- \*One egg per cup of liquid
- \*Scientific Process Sheet, one per student

Question: \_\_\_\_\_

\_\_\_\_\_

Hypothesis: \_\_\_\_\_

\_\_\_\_\_

Procedure

1. Place an equal measurement of each liquid – water, vinegar, orange juice, diet soda, clear soda, dark soda - into a cup, labeling the outside of the cup with the name of the contents.
2. Inside each cup of liquid place an egg.
3. Check the eggs every few days to see what is happening to the egg shell. Record your observations in the boxes below.
